Hood	L42-M30 SF	White BA15D	1
Turn signal dash	LDB12WNP-18DS	White BA9S	1

Notes:

- Litezupp does not recommend changing the IGN lamp if it is used as part of the battery charging circuit.
- Litezupp has researched available documents for your vehicle and believes the list of LED replacements types are accurate. Unfortunately, documents could be in error, trim packages may be different, or changes may have been made to the vehicle.
- We will work with you to correct any deficiencies. It is always best to review the list before ordering.
